[Hiring Manager Name] [Hiring Manager Title] [Company Name] [Company Address]

**Subject: Regarding the [Job Title] opportunity**

Dear [Mr./Ms./Mx. Last Name],

I was thrilled to see the opening for a [Job Title] at [Company Name] on [Platform where you saw the advert, e.g., LinkedIn]. My background in building backend systems with Python and Django, combined with my deep dive into blockchain development, seems like a perfect match for what you're looking for. I build practical, project-driven solutions, and I'm eager to bring that hands-on approach to your team.

For me, the best way to learn is by building. Right now, I'm leading my university capstone project—a blockchain-based supply chain system for agriculture—where I'm responsible for both the Django REST backend and the Vyper smart contracts. This experience is complemented by my role leading the award-winning NLPAY project for the Google Developers Community. There, I guided our team in creating an AI learning platform for local language speakers, handling everything from task allocation and version control to delivering our final prototype.

What really draws me to [Company Name] is your [Mention something specific and genuine that impresses you. Examples: "...commitment to using cloud-native tools to solve complex problems," or "...pioneering work in the decentralized finance space," or "...focus on creating user-centric products like [mention a specific product]"]. It aligns directly with my own drive to build impactful technology. My experience isn't just academic; my GitHub is full of projects where I've put tools like Kubernetes, Django, and Vyper to practical use. I'm confident I can jump in and start contributing to your goals.

I'm looking for a role where I can not only apply my current skills but also grow into a high-impact developer. Everything I've seen about the culture and projects at [Company Name] suggests it's the right place for that.

My resume provides more detail, and I hope we can connect soon to talk about how I can contribute to your team.

Best regards,

Didier IMANIRAHARI
